FOR IMMEDIATE RELEASE

**SABEUS PHOTONICS SIGNS ON WITH UR GROUP TO MARKET
OPTICAL COMPONENTS IN EUROPE**

UR Group Will Market Precision Advantage™ Line of Optical Components

Calabasas, CA - June 14, 2005 - Sabeus Photonics, a developer of fiber optic components and subsystems for telecommunications, acoustic sensing and surveillance applications today announced today that it signed the UR Group as its exclusive distributor in Europe, Middle East and Africa.

With an established pan-European footprint and longstanding and successful relationships with leading European telecom infrastructure vendors, the UR group is well positioned to supply Sabeus' high precision passive and active components to fiber optic systems manufacturers.

"We are very pleased to be working closely with the UR Group on a variety of fiber optic applications" said André de Fusco, president & CEO of Sabeus. "UR's skilled staff, operational excellence and strong customer base offer an unbeatable value to Europe's top photonic systems manufacturers."

"Sabeus' Precision Advantage™ components enable a new level of performance for our customers building advanced fiber optic systems", said Giovanbattista Laghezza, C.E.O. & Managing Director of the UR Group. "Our group is ideally positioned to support future demand at various European engineering centers."

The result of years of photonics research and development, Precision Advantage™ is Sabeus' patented, ultra-precise, in-fiber family of filters offering exceptional linearity, lowest insertion loss and lowest chromatic dispersion. Sabeus' industry leading solutions have been adopted by over 30 major optical equipment vendors for LAN, WAN and Long Haul telecommunications systems.

About Sabeus

Sabeus, founded in 1998, has offices in Calabasas, California, Houston, Texas, Freeport, Pennsylvania and Calgary, Alberta, (Canada). Sabeus is ISO and Telcordia certified and is privately funded. The company offers fiber-based products to three primary market segments: *Sabeus Oil & Gas* manufactures rugged fiber optic sensors to measure pressure, temperature, and seismic data for oilfield reservoir monitoring and pipeline integrity applications; *Sabeus Federal Systems* is a licensed government contractor and manufactures fiber optic intrusion detection systems and sensor arrays for surveillance applications; *Sabeus Photonics* manufactures a variety of proprietary, high performance fiber optic components for telecommunications, industrial and government applications.

About UR Group

Founded in 1996, the UR Group is a leading European sales organization for High Tech electronic components and subassemblies for embedded system solutions. UR adds critical technology know how, embedded systems expertise and resources to help its customers to define, design and manufacture embedded system applications serving their global markets and growth strategy. The unique mix of a High Tech portfolio with more than US \$5B in market value that is accessible through the UR Group brings a strategic advantage both to our Principals as well as our customers, enabling both to more quickly turn ideas and concepts into designs and profitable, competitive solutions than their competition. We are the fastest growing business partner for our Principals and customers in Europe in this field, providing both with service through one single, highly motivated, transparent, international and easy-to-work-with organization.
